FOR IMMEDIATE RELEASE

Groendyke's Hutchinson Terminal Reaches Safety Milestone

HUTCHINSON, Kan. (March 1, 2016) — Groendyke Transport's Hutchinson terminal recently set a company record for consecutive miles without an at-fault accident.

Between July 2014, and February 2016, drivers at the Hutchinson terminal combined to accumulate 11,905,472 consecutive safe miles, eclipsing the previous company record set by the same terminal in 2001. During that run, Hutchinson's drivers amassed more than 10 million miles between September 1997 and April 2001.

"This is an impressive accomplishment for our drivers. Considering the company has been in business for more than 80 years, to hold both the No. 1 and No. 2 spots on the terminal safe miles list is truly humbling," said Hutchinson terminal manager Mark Munds. "Our drivers, mechanics and the entire terminal staff have a persistent dedication to safety, and it shines through in their accomplishments. From providing the latest in safety technology, to regular safety meetings and training sessions, we strive to ensure the safety of the motoring public and our drivers as well as the protection of the environment and property."

Founded in 1932, Groendyke Transport is one of the largest tank truck carriers in the nation with about 1,400 employees nationwide and has set a standard for safety in the industry. The company has won the coveted Heil Trophy an unprecedented six times. National Tank Truck Carriers gives this award annually to the carrier with the top safety record and program in the country.

The Hutchinson terminal has played a key role in Groendyke Transport's safety reputation. In between its two record-setting feats, the terminal also enjoyed an 8-million-mile stretch, a 5-million-mile stretch, three 4-million-mile stretches and a 3-million-mile stretch without an at-fault accident.

The terminal employs about 70 drivers who primarily deliver propane, butane, fuel and asphalt to locations in Kansas, Colorado, Oklahoma, Minnesota and Texas. A staple of the Hutchinson economic landscape, Groendyke Transport's Hutchinson terminal, one of 29 nationwide, has been in business since 1952.
